

Seaport Management Information Solutions Experts

Seaport IT Advisory Services

WHO WE ARE:

Nicom Maritime are experts in management information solutions, offering both professional advisory services and software products to the seaport industry. We help our clients identify their business needs and recommend technology solutions that streamline communication processes, improve efficiencies and reduce operational costs. We provide our clients with the best information technology advice and in turn, the best solutions.

WHAT WE OFFER:

SEAPORT IT ADVISORY SERVICES

Nicom Maritime offers a range of IT advisory services to the seaport industry. We deliver effective technological solutions that improve information flow and communication between multiple stakeholders without interfering or stopping your day-to-day operations. We work with our clients to gain and maintain a strategic business advantage by providing the best information technology advice and in turn, the best solutions.

Our services include:

- IT Strategic Planning/Operational Review
- Custom Software Development
- Software Procurement
- Website Development

“ By using the system developed by Nicom Maritime we were able to reduce our dwell time by 37% ”

-Karen Oldfield, CEO Halifax Port Authority

Nicom has been in the IT business for over 27 years. Our technicians are Microsoft Certified Professionals and Nicom is a Microsoft Gold Certified Partner.

Custom Software Development

A common problem for seaports is finding software that interfaces with existing systems and provides specialized seaport-specific functionality. Nicom Maritime has decades of experience in developing custom software solutions. We follow proven practices that result in successful project completions and deliver solutions that meet customer expectations.

IT Strategic Planning/Operational Review

Nicom Maritime has decades of Information Technology Planning and Operational Reviews. Our objective is to identify the right strategies to maximize your organization's technology resources and to develop a plan for implementation. Our exceptional in-house consultants have a strong understanding of the systems and technology issues that are important to a port. Our process takes into consideration:

- » The requirements of each department
- » The personnel in the MIS department
- » The current and planned use of technology

The end result is a detailed plan outlining the recommended changes and investments related to information technology.

Software Procurement

The process of procuring a new software product can be quite demanding. Nicom Maritime has extensive experience in managing the software selection process for Port and Pilotage Authorities in their search for new systems. Our comprehensive procurement methodology follows a structured approach ensuring we find and recommend the best product that meets your organization's needs while meeting your financial requirements.

INTERACTIVE WEB DESIGN | DEVELOPMENT

A professionally designed and developed website is not only an effective marketing tool, but can also become an interactive platform for your clients, employees and key stakeholders. Nicom Interactive is focused on creating dynamic websites that transform an organization's online presence, nurture relationships with key groups and improve the dissemination of information. Whether refreshing the user experience, developing an intranet, integrating applications or custom tools, our team makes the web work.
