

Port Operations & Revenue Tracking System (PORTS)

PORTS is an integrated vessel scheduling, billing and lease management system that streamlines processes and improves efficiencies for port authorities. This sophisticated system tracks vessel dockage and cargo activities and automates billing, freeing up resources that can be reassigned to other port operations. PORTS includes a robust reporting capability which enables port administrators to easily access real-time analytics providing insight and supporting strategic decision-making processes.

“ Not only are the staff at Nicom technically very competent, they are great to work with. ”

Ralph Seely, Vice President & Administration, Saint John Port Authority

Nicom has been in the IT business for over 27 years. Our technicians are Microsoft Certified Professionals and Nicom is a Microsoft Gold Certified Partner.

Hazardous Goods Certificate

PORTS' web-based Hazardous Goods Certificate application streamlines the flow of information and approval process for port authorities, their customers and city emergency departments. The system allows authorized users to easily complete a permit online and receive automatic notification of status from the port authority, while city emergency departments are notified of the ship's arrival and hazardous goods onboard. PORTS enhances maritime safety and ensures all stakeholders are kept up to date.

SYSTEM FEATURES

PORTS is able to integrate with various existing operational systems enabling the efficient automation of invoicing, tracking and reporting on port transactions, vessel calls and revenue generation. The easy-to-use interface allows stakeholders to quickly access and evaluate information they need to maintain accurate records and forecast for the future.

Invoicing System

PORTS billing module can be easily integrated with existing accounting systems and can calculate a wide variety of tariffs and fees such as:

- >> Harbor dues
- >> Dockage
- >> Berthage
- >> Wharfage
- >> Throughput charges
- >> Leases
- >> Water
- >> Storage

Management Reports

PORTS' robust and user friendly reporting tool can generate graphically appealing ad-hoc or custom reports. Whether seeking statistical data or gathering marketing intelligence, decision makers are able to get the right information on time and export to an Excel or HTML format. Types of reports available:

- >> Commodity by tonnage
- >> Weekly vessel reports
- >> Facility usage
- >> Daily manifest control
- >> Tonnage by container counts

WHO WE ARE:

Nicom Maritime are experts in management information solutions, offering both professional advisory services and software products to the seaport industry. We help our clients identify their business needs and recommend technology solutions that streamline communication processes, improve efficiencies and reduce operational costs. We provide our clients with the best information technology advice and in turn, the best solutions.
